## Moisture Barrier Bag 6mil

### ANT018MBB

#### Description

To protect electronics from moisture and static damage. The bags are opaque and light tight ensuring the inside item can not be seen from outside. Suitable to pack electronic products which are sensitive to moisture and static, such as PCBs, Integrated circuits etc.

#### Features

- Protect your expensive electronics from moisture and static damage
- In flat open top style, printable surface
- Firm lamination and hot sealing offer superior resistance to vapor and oxygen
- Surface resistance 10<sup>8</sup>-10<sup>11</sup>Ω
- Strong tensile strength

Usage: Applicable to pack electronic products which are sensitive to static and moisture

#### Construction

Our 6 mil moisture barrier bags are constructed in 5 layers. The bag features an anti static metallized polyester outer layer and an anti static inner layer. In between are layers of polyethylene, nylon and an aluminium foil shield.

#### Configuration(s)

Our bags are available in custom sizes or in several industry standard sizes. Bags are offered in a 3-seal configuration, with our standard flexographically printed artwork. Our bags can also be personalised with your company logo on any bespoke orders.

#### Standard Bag Artwork

Our moisture barrier bags are produced with the following sample artwork as standard. For further information on bespoke/printed orders, please contact one of our sales team.

Note: All of our moisture barrier bags are batch coded for QC traceability.

#### Construction

Static Dissipative Layer
Polyester
Aluminium Foil
Nylon
Polyethylene
Static Dissipative Coating
