

PRODUCT

ESD Drinking Bottle

These moulded polyethylene bottles utilise a concentrate that does not contain any Ethoxylated Tertiary Amine, which is widely used as an antistatic agent.

These ESD safe bottles have an average surface resistivity of 10^9 to 10^{10} Ohms/square and do not have any less desirable features associated with surfactant laden material.

These bottles will dissipate a static charge of $\pm 5000V$ in less than 2 seconds at 40% relative humidity. By their chemical nature, they will not have any chemical reactivity with solvents as TCE or alcohol.

PRODUCT CODE	DESCRIPTION	SIZE (oz)	NOTES
146-0077	ESD Drinking Bottle	32	Each
