

Bioguard Hand Foaming Cleanser

Features

- A high-density foam giving excellent coverage to all areas.
- The applied foam rapidly collapses and decontaminates, killing bacteria and inactivating viruses before cleaning.
- Provides hand & body disinfection where wash facilities could be a problem.

For truly effective infection control Bioguard's infection control products have been specially formulated to meet stringent user requirements whilst offering the following unique range of performance benefits.

Range of Host Surfaces. Products can be used on virtually all types of environments including hard surfaces, fabrics and soft furnishings (Including uniforms, bedding, carpets and curtains).

Host Surface Integrity. Bioguard products will not cause damage or degradation to surfaces, such as the bleaching of fabrics, corrosion of stainless steel or stress fractures in plastic surfaces.

Environmental Impact . Environmental audits by leading European Authorities have concluded that Bioguard infection control products are non-toxic, biodegradable and non-cumulative in the eco-system therefore overcoming concerns regarding product disposal and accidental spillage. Independent Testing of Products. We have undertaken testing on various aspects of product performance and believe that this testing philosophy provides our clients with the important reassurance of our products superior performance. It is our understanding that no other hygiene and infection control company provides these levels of independent verification of its products performance.

User-friendly. Our products do not irritate or sensitise the skin. Ease of use. By providing greater usage dilution efficiencies our products provide our clients with a more cost effective infection control solution.

Safe to use. Our products are non-hazardous and present significantly greater Health & Safety benefits in terms of operator risk assessments, product preparation, product use and storage of chemicals. Microbiological Efficacy. Our product is capable of eliminating a broad range of viruses, bacteria and mycobacterium.
