

PRODUCT

Earth Bonding Point

An earth facility (EF) is the central connecting point for the electrical mains earth or a dedicated ESD earth, within an EPA, (Electrostatic protected area).

An earth bonding point (EBP) can be used to ground bench matting, floor matting and wrist straps together so as to be at the same electrical potential.

It is important to remember that in any EPA there can be many EBPs but there must only be one EF: Earth facility connection.

FEATURES

- Designed to be fixed to the work-bench
- Fitted with 1 x M5 post
- Yellow coloured design for easy identification and features an ESD warning symbol
- Material ABS
- No resistor
- 2m long earth wire with an eyelet termination
- Supports EN 61340-5 and can be used as part of an ANSI/ESD S20.20 program

PRODUCT CODE	DESCRIPTION	SIZE	NOTES
070-1012	Earth Bonding Point (No resistor)	1 x M5 post	Each
