13" Antistatic HIPS Packaging Reels

029-2090

Antistat component packaging reels are ideal for shipment and storage of any component packaged in carrier tape.

CONFIGURATIONS

Antistat Split Reels have an outside diameter of 13" (330mm) and a 1/2" (13mm) diameter arbor hole. Reel halves are available in a variety of hub diameters and hub widths. Hub diameters are standard 4" (102mm) hub suitable for most carrier tapes. Available hub widths include 4mm, 8mm, 16mm, 28mm and 44mm. Any combination of these hub widths will combine to produce a reel for EIA standard carrier tape widths of 4, 8, 12, 16, 24, 32, 44, 56, 72 and 88mm. The table demonstrates combinations and the reel widths they produce.

SHELF LIFE AND STORAGE

We recommend that Antistat split reels be used within three years from the date of manufacture. Store this product in its original packaging in a climate-controlled environment where temperature ranges from 20° C - 30°C (68°F - 86°F). Allow the product to stabilize at room temperature prior to use. The mechanical integrity of the product is not affected by humidity.
